Rhino TQ3 110V Halogen Heater Details

A high efficiency thermo-quartz heater that's ideal for both temporary heating and drying paintwork & plaster. Using high frequency heat waves that penetrate the air without heating it, TQ3 warms objects and people rather than the atmosphere. This results in lower running costs because heat is not lost through drafts or pre-heating.

Available in 110v for site use, or 240v for use with standard household electrical sockets. This version is 110V.

Features

- Instant heat at the flick of a switch
- Twin 1400W infra-red elements
- 2.8kw heat output
- Two heat settings
- Integral wheels for easy mobility
- Plastic body resists dents and scrapes
- Rugged construction to withstand site use
